TERMS OF REFERENCE/ SPECIFICATION

1. PURPOSE

- 1.1.** The purpose of this Request for Quotation (RFQ) is to appoint a reputable services provider to conduct rodent control treatment at Geluksdal Shopping, Johannesburg, Gauteng Province, for the subsidiary of the Small Enterprise Development and Finance Agency (Sedfa) Khula Business Premises (Pty) Ltd (Kbp)

2. PROJECT BACKGROUND

- 2.1** Rodent infestations are a recurring challenge in commercial and public buildings due to the availability of food sources, shelter, and concealed movement areas such as ceiling voids, storerooms, ducting systems, basements, waste areas, and adjoining service corridors. Over time, these conditions allow rats and mice to establish harborage sites within the facility, posing both operational and health risks.
- 2.2** Rodents present significant concerns for building occupants, including:
- Health risks:** transmission of diseases through droppings, urine, and contamination of surfaces.
- Damage to property and infrastructure:** gnawing on electrical wiring, insulation, cabling, documents, and stored materials.

Operational disruption: failure of equipment due to rodent damage, unpleasant odours, and unsanitary conditions.

2.3 These risks highlight the need for a structured, compliant, and professionally delivered rodent control treatment.

2.4 The project aims to implement an effective, once-off rodent control intervention delivered by a registered and qualified Pest Control Operator in accordance with the requirements of the Fertilizers, Farm Feeds, Agricultural Remedies and Stock Remedies Act (Act 36 of 1947).

3. SCOPE OF WORK

3.1 The treatment must target both **rodent infestations**.

3.2 Use safe, approved pesticides or baiting methods, with minimal risk to human occupants.

3.3 If chemical treatment is used, the residues / devices (bait, traps, etc.) must be placed so as to minimize exposure to office staff, with emphasis on identifying rodent entry points, nesting sites, and conducive environmental conditions so that the treatment is targeted, effective, and aligned with best-practice Integrated Pest Management (IPM) principles.

3.4 Place all anticoagulant baits in locked tamper-proof boxes.

3.5 Provide a **clear safety plan**: when treatment will be done, areas to restrict, whether evacuations are needed, re-entry times, and signage.

3.6 The technician(s) should ideally work at a time that causes minimal disruption to building occupants.

3.7 The service provider must provide pre- and post-treatment documentation, including a report of the work done, the chemicals used (including safety data sheets), and recommendations for future prevention.

3.8 All pesticide products used must be registered / legally approved in South Africa.

3.9 Bidder must comply with all relevant Health & Safety standards.

NB: Bidders that do not quote as per the requirements/ specification will be regarded as non-responsive, and such proposals/ quotations will be disqualified.
